

Resolver

- 1 Search for negative numbers and combine the two tokens into one
- 2 Find innermost brackets and resolve the contents, replacing all tokens including the brackets with one token for the result
- 3 From left to right find the terms and replace the 3 tokens with one token for the result
- 4 When all terms are resolved, from left to right find the expressions and replace the 3 tokens with one token for the result
- 5 You are left with one token that represents the result
